

● CD MECHANISM MODULE GREASE APPLICATION LOCATION

In the exploded view, (P) and (E) indicate the kinds of grease used in the CD mechanism:

**NOTE:**

(P): PG-641 (yellow grease made by Dow Corning)

(E): E paste (yellowish White paste made by Dow Corning)

\* The E paste has higher viscosity than the PG-641 does.  
Be careful not to apply to your clothes when handling it.
